*These repackaging instructions and the Instruction Sheet for inclusion in the product package are available to print on ePOP (Items D3019356-01 and D3019356-02).*

## Secure Wrap Label

Place Label against side edge of Wrap at 22 inches from the bottom edge as shown in photo below *(make sure Label is not upside down)*. Place tape across both back side of Label and Wrap. Place Instruction Sheet on top and roll everything up so Label finishes on outside. Slide Wrap into poly tube and fold open end over and tape closed.

*Note: Do not tape Label to front side of Wrap. Tape residue will cause wood finishing problems.*
